Summary

Python AI Developer with hands-on experience building production-grade backend systems, RAG pipelines, NLP APIs, voice and chat AI, and AI-powered automation tools. Skilled in FastAPI, OpenAI/Gemini integrations, vector search, palm and face-based report generation, and full-stack development, with a track record of shipping robust, scalable solutions across multiple domains.

Work Experience

AI Developer, Stulink Private Limited Dec 2025 – Present

- **Developing AI features** for the **Pandit AI** application, an intelligent platform for astrology and spiritual guidance.
- **Built AI-based call and chat systems** enabling real-time conversational AI for users seeking personalised consultations.
- **Engineered palm reading AI** — processes palm images to extract life, heart, and fate line features and generates detailed personality and health reports using computer vision and LLMs.
- **Implemented face-based analysis** — detects facial features and generates AI-driven personality, wellness, and compatibility reports using OpenCV and deep learning models.
- **Designed report generation pipelines** that combine user inputs, palm/face analysis, and astrological data to produce structured, personalised PDF reports.
- **Integrated LLM-powered chat** for astrology Q&A, providing context-aware responses grounded in user horoscope and birth data.
- **Collaborated with product and mobile teams** to deliver AI endpoints consumed by the iOS/Android Pandit AI app.

Python AI Developer, Perimattic June 2025 – Dec-2025

- **Developed and deployed** backend APIs using FastAPI, reducing AI model response time by **30%**.
- **Designed and implemented** AI-powered resume parsing pipelines, achieving **95%+ accuracy** in structured data extraction.
- **Optimized** data preprocessing and model training workflows, decreasing runtime by **25%**.
- **Integrated** third-party APIs (Gemini, OpenAI), enabling **automated insights generation** for end-users.
- **Conducted model evaluation and fine-tuning**, improving prediction reliability by **20%**.
- **Collaborated** with cross-functional teams to deliver AI solutions aligned with business goals.
- **Monitored and enhanced** system performance via logging and error handling, reducing production incidents by **15%**.

Full Stack Developer, Onebanc Technologies Aug 2024 – May 2025

- **Developed** responsive, secure web applications using JavaScript, HTML, and CSS, increasing user engagement by **15%**.
- **Designed and maintained** RESTful APIs in Python, cutting client-server latency by **20%**.
- **Administered and optimized** MySQL, PostgreSQL, and MongoDB databases, improving query performance by **30%**.
- **Implemented** authentication and authorization mechanisms, enhancing data security and compliance.
- **Refactored** legacy code to improve stability, reducing downtime by **25%**.

- Maintained **CI/CD pipelines** and Git workflows, ensuring smooth and reliable deployments.
- **Conducted unit testing and debugging**, reducing post-production bugs by **20%**.

Full Stack Developer, Webistic Apr 2024 – Jul 2024

- Built and maintained **scalable web applications** using Python (Django/Flask), React, and JavaScript.
- Improved **frontend performance and UX**, delivering responsive designs and reducing page load times.
- Designed and optimized **relational and NoSQL databases** (MySQL, PostgreSQL, MongoDB).
- Worked in an **Agile environment**, contributing to sprint planning, stand-ups, and peer code reviews.
- Deployed applications on **AWS/Heroku** with CI/CD pipelines for rapid iteration.

Python Programmer (Training) Apr 2023 – May 2023

- Completed intensive training in **Python**, covering core concepts, OOP, and data structures.
- Built **mini-projects** including data parsing scripts, automation tools, and API integrations.
- Gained hands-on experience with **Pandas, NumPy, and Requests**.

Projects

AI Knowledge Assistant *[GitHub]*

Built a **document Q&A system** using FastAPI, FAISS vector search, and GPT-4o-mini. Supports PDF and DOCX uploads and returns **AI-generated answers with cited page references**. Achieves sub-second retrieval at scale via semantic chunking and embedding pipelines.

AI Resume Screener *[GitHub]*

Developed an **intelligent recruitment automation tool** that parses and scores candidate résumés against a job description using NLP (spaCy) and OpenAI. Ranks applicants by fit score; containerised with **Docker** for production deployment.

BuildOS — Social Brand AI Platform *[GitHub]*

Full-scale **personal brand intelligence platform** connecting YouTube and Instagram via OAuth. Calculates a real-time Brand Score, predicts content virality, and benchmarks against competitors using FastAPI, PostgreSQL, and AI analytics.

Multi-Client RAG Chatbot Engine *[GitHub]*

White-label **AI chatbot SaaS** serving multiple business clients from a single FastAPI backend. Each client receives a dedicated **Pinecone vector index**; Playwright-powered automation handles data ingestion; OpenAI drives Q&A.

StudConnect — University Discovery Platform *[GitHub]*

Production-grade **EdTech platform** for university shortlisting and applications. AI-powered match scores, scholarship search, counsellor booking, and OTP-secured auth backed by **FastAPI + PostgreSQL + MongoDB**.

AI Phone Voice Assistant *[GitHub]*

Production-ready **AI voice bot** answering real phone calls via Twilio. Uses Deepgram for real-time speech-to-text and Sarvam AI for TTS responses, handling inbound/outbound calls with full transcription via FastAPI.

Education

2021 – 2025 BTech in AI & ML at **CGC University** (CGPA: 8.6/10.0)
2021 Higher Secondary (Class XII) (CBSE)

Certifications & Achievements

- Completed workshops on **Robotics** and **Embedded Systems**.
- Attended sessions on **Generative AI** in Bioinformatics.
- Served as **Coordinator** for Engineers' Day 2023.
- **Finalist** at National Level IDEATHON 2024.

Skills

Skills

Languages	Python, JavaScript
AI & LLM Engineering	LLM Applications, AI Agents, Agentic Workflows, RAG, Prompt Engineering, Function Calling, Tool Use, OpenAI, Anthropic Claude, Google Gemini, HuggingFace Transformers
Machine Learning	PyTorch, Scikit-learn, Deep Learning, NLP, Feature Engineering, Model Evaluation
Computer Vision	OpenCV, MediaPipe, Palm/Face Analysis, Image Processing, Vision-based AI, Image-based Report Generation
RAG & Vector Search	FAISS, Pinecone, Semantic Search, Vector Databases, Embedding Pipelines, Chunking, Retrieval Pipelines
Voice & Conversational AI	LiveKit, Deepgram STT, Sarvam AI TTS, Twilio, Real-time Voice AI, AI Call Systems, Conversational AI, WebSockets
AI Automation & Agents	n8n, AI Agent Workflows, Workflow Automation, Webhooks, API Integrations, Automated Pipelines
Backend & APIs	FastAPI, Flask, Django, REST APIs, OAuth2, JWT, Async APIs, API Integrations
Databases	PostgreSQL, MongoDB, MySQL, Redis
Data & Processing	Pandas, NumPy, PyMuPDF, python-docx, Structured Data Extraction, PDF Generation
Web Automation	Playwright, Selenium, BeautifulSoup, Web Scraping
Frontend	React.js, JavaScript, HTML, CSS
DevOps & Cloud	Docker, Git, CI/CD, AWS, Azure, Postman, ngrok
